Vectors

Vectors

Arrays of variable size

```
let mut primes: Vec<i32> = Vec::new();
```

```
let mut primes = vec![2, 3, 5];
```

Vectors

Arrays of variable size

```
let mut primes: Vec<i32> = Vec::new();
```

```
let mut primes = vec![2, 3, 5];
```

Adding elements

```
primes.push(7);
```

Vectors

Arrays of variable size

```
let mut primes: Vec<i32> = Vec::new();
```

```
let mut primes = vec![2, 3, 5];
```

Adding elements

```
primes.push(7);
```

Removing elements

```
primes.remove(2);
```

Vectors

Create vectors with default values

```
let mut numbers = vec![2;10];
```

```
const DEFAULT: i32 = 6;
let mut numbers = [DEFAULT;8];
```

Vectors

Create vectors with default values

```
let mut numbers = vec![2;10];
```

```
const DEFAULT: i32 = 6;
let mut numbers = [DEFAULT;8];
```

Updating elements

```
numbers[3] = 5;
```

Vectors

Create vectors with default values

```
let mut numbers = vec![2;10];
```

```
const DEFAULT: i32 = 6;
let mut numbers = [DEFAULT;8];
```

Updating elements

```
numbers[3] = 5;
```

Using an iterator

```
for number in numbers.iter() {
   println!("{}", number + 3);
}
```
